EDUCATION

School of Science & Engineering | Tulane University — New Orleans, USA
Ph.D. student in Computer Science — Jan. 2021 - Present
Purdue School of Engineering & Technology | Purdue University — Indianapolis, USA
Ph.D. student in Electrical and Computer Engineering — Jan. 2018 - Dec. 2020
Department of Electrical & Computer Engineering | Northeastern University — Boston, USA
M.S. in Computer System Engineering — Sep. 2016 - May 2018
Department of Electronic and Information Engineering | Xi'an Jiaotong University — Xi'an, China
B.S. in Electronic Science and Technology — Sep. 2012 - Jul. 2016

RESEARCH PROJECTS

Towards Novel Target Discovery Through Open-Set Domain Adaptation — Nov. 2020 - Mar. 2021
Research Assistant |Tulane University, New Orleans, USA — Supervisor: *Prof.* Zhengming Allan Ding

- Proposed a challenging but practical task as understanding the unknown categories in the open-set tasks
- Designed an effective framework to identify seeing categories and recover semantic attributes for unseen categories
- Constructed two cross-domain open-set recognition and semantic recovery benchmarks to evaluate the framework

Adaptively-Accumulated Knowledge Transfer for Partial Domain Adaptation — Jan. 2020 - Apr. 2020
Research Assistant | Purdue University, Indianapolis, USA — Supervisor: *Prof.* Zhengming Allan Ding

- Presented a dual distinct classifier model to align cross-domain distribution and task-specific decision boundaries
- Proposed a source-guided adaptively-accumulated learning strategy to facilitate cross-domain knowledge
- Achieved state-of-the-art performance on several commonly used partial domain adaptation tasks

Adversarial Dual Distinct Classifier for Unsupervised Domain Adaptation — Mar. 2019 - Jun. 2019
Research Assistant | Purdue University, Indianapolis, USA — Supervisor: *Prof.* Zhengming Allan Ding

- Exploited dual task-specific classifiers architecture to align cross-domain distribution and decision boundaries
- Proposed a novel discriminative cross-domain alignment loss and importance guided optimization strategy to mitigate the cross-domain mismatching and learn the domain-invariant embedding features across domains
- Created new state-of-the-art on several cross-domain visual unsupervised domain adaptation benchmarks

EV-Action: Electromyography-Vision Multi-Modal Action Dataset — Jan. 2018 - Jul. 2018
Research Assistant | SMILE Lab, NEU, Boston, USA — Supervisor: *Prof.* Yun Raymond Fu

- Collected and introduced the first, large-scale EV-Action dataset consisting of RGB, depth, electromyography, and two skeleton modalities for human action recognition tasks including over 7,000 samples from 70 human subjects
- Proposed an effective framework for EMG-based action recognition and reported the state-of-the-art performance
